Retention Approvals (Check docs and approving Staged installed towers)  
SAP (YEXP,FBL3)Reports generation, Imprest Approvals

### **Muscle Trainer — A Gym Website Built Using HTML/CSS/Java Script/React.Js/My Sql(XAMPP)**

Our Project is a gym based developed by using React.js library using HTML,CSS,JS,& MYSql(XAMPP) as a Database to store personal data for sign up/login & reports purpose Since client asked for a responsive & Quick loading web design for the business so we created in react.js it is a (SPA) Single page Application so we can view & Browse content in one page and loading time is efficient than the (MPA)Multiple page application which helps to save time
